

Resolution from the 3rd APGF Congress in NZ

Number: 11 (FINAL)

Short title	Climate change and the Paris negotiations
Proposed Resolution Text (about 3 points)	<p>This meeting of the Asia Pacific Greens Federation resolves that:</p> <ol style="list-style-type: none"> 1. Individual countries must set ambitious greenhouse gas reduction targets for post-2020, consistent with constraining global warming to at least below 2 degrees 2. That these targets not be based on Business as Usual but rather transparent, scientifically robust measurement of emissions below a designated base year; 3. That the Paris Agreement be legally binding, ambitious and contain accountability measures; 4. That climate justice, particularly the rights of first peoples and local communities, be an integral part of the post-2020 agreement, and that climate justice principles be applied in redoubling efforts to secure finance from developed countries for the Green Climate Fund; 5. That the role of cities and sub-national governments in meeting greenhouse gas emission reduction targets globally be better recognised as a significant part of global reduction efforts; 6. That nuclear power generation be opposed as too slow, too dangerous and too expensive in the fight against global warming.
Proposed by (person and country)	Christine Milne, Australia and Russel Norman, New Zealand
Contact details (Email, phone)	senator.milne@aph.gov.au
Also Endorsed by (optional)	Nepal, Taiwan, Pakistan
Action to be taken from the resolution	APGF sends a clear signal to the global community about our collective resolve to address global warming.
Any policy background & reason for the resolution	This resolution was developed out of the workshop on climate change and the COP process facilitated by Christine Milne and Russel Norman, in which representatives from around the region were able to discuss the road to the Paris negotiations, climate change, and our collective responsibility to address climate justice in the region.
