

Post-earthquake Community Service Program

Mulpaanni VDC, ward no 9 of Dhading district is one of the worst affected rural and remote communities of Nepal by 25th April massive earthquake.

In this naturally beautiful community, 19 people have died, 67 houses out of 93 houses have been completely collapsed.

Remaining houses are also severely damaged making them dangerous to live.

Additionally, a school building and a community meeting building have been collapsed.

Their stored food grains are under the debris of collapsed home. They are facing acute food shortages and food deficiency. Especially, children are badly affected due to hunger.

Till now, more than 5000 people of the whole VDC (9 communities) are living without adequate healthy and nutritious foods.

The people do not have individual tents to spend days and nights. Seven family members are found to have lived together under a single tent.

Especially, homeless children are adversely affected. They are having troubles while spending nights on open ground.

All the clothes are under the rubble of the collapsed house. They do not have additional clothes to wear.

The people do not have clean drinking water and toilets. They go to nearby river for long toilet. The open defecation could cause river pollution and outbreaks.

The immediate need of the village is adequate and nutritious food, clothes, high quality tents/shelter, mosquito nets, sanitary pads for young girls and women, clean drinking water and toilets.

The village is very far away from Kathmandu city. It is nearly 137 Km far away from Kathmandu. The road from the highway up to the village is extremely dangerous and worst. Till now, no government and non-governmental organizations have reached the villages with relief packages.

We want to serve more hungry and victimized people of this region with adequate and nutritious foods, clothes, high quality tents/temporary shelter, mosquito nets, sanitary pads for young girls and women, clean drinking water and help them build toilets.

Additionally, we want to help the homeless people to rebuild their houses, which will be designed and constructed as an earthquake resistance home.

We, a youth-led non-governmental foundation, Team for Nature and Wildlife (TNW), would like to request all of you to donate our organization to serve more and more victims of far remote areas.

In the first phase, we want to serve the victims with foods, shelter, clothes, high quality tents, clean drinking water and toilet in the first phase. In the next phase, with your support, we want to build an earthquake resistance home for all the victims of the communities. In the third phase, we want to rebuild the school buildings so that there will be a safer place for the children to get education.

Donations can be made to the following official bank account numbers:

Beneficiary Name:

Team for Nature & Wildlife (TNW)

Beneficiary Account No:

What we are doing?

We have set up a **Community Kitchen** in two badly affected remote communities by the earthquake. Our team of young people and volunteers are camping on site, cooking foods and serving healthy and nutritious foods and clean drinking water to the earthquake victims.

Why we set up Community Kitchen?

The earthquake victims have not still received relief materials from any governmental and non-governmental agencies. The people are found to have lived hungry for 3 days. The victims are deprived of adequate healthy and nutritious foods.

The women are engaged on cooking. They are found to have been suffering from respiratory diseases though firewood burning.

Most of the victims or survivors are found to be physically weak and psychologically stressed and depressed.

That's why, we set up **community kitchen** to cook and serve foods with the help of our volunteers so that the victims or survivors will not have any physical stress for food and much more time to have a rest.
